

Ref No. : 2026-UR-3465

11<sup>th</sup> March 2026

## TO WHOM IT MAY CONCERN

This is to confirm that Mr. Lokubaduge Pramitha Mihiranga Jayasooriya worked as an Intern in the Digital Transformation Team at WSO2 Lanka (Private) Limited from 22<sup>nd</sup> July 2024 to 21<sup>st</sup> January 2025.

WSO2 is the world's #1 open-source integration vendor, helping digitally driven organizations become integration agile. The company's hybrid platform for developing, reusing, running, and managing integrations prevents lock-in through open-source software that runs on-premises or in the cloud.

He has performed the following duties and tasks:

- Contributed to the development and deployment of cloud-native backend solutions during the internship at WSO2 LLC as part of the Digital Transformation Team, focusing on enterprise integrations, automation workflows, and modernization of internal systems.
- Implemented backend services using Ballerina to support internal enterprise applications and integrations. These services exposed secure RESTful APIs for managing system workflows, processing data, and enabling communication between internal platforms.
- Designed and implemented AWS Marketplace integration workflows to publish WSO2 on-premise products through three seller profiles (WSO2 API Manager, WSO2 Identity Server, and WSO2 Integrator). This solution enabled automated product listing, customer onboarding, and post-purchase workflows for AWS Marketplace users.
- Implemented subscription entitlement validation using the AWS Marketplace Entitlement API to verify customer subscriptions and contract details after product purchases, ensuring secure access to services based on entitlement parameters.
- Developed backend components using Golang to process real-time subscription lifecycle events via Amazon SQS and Amazon SNS, retrieve entitlement data from AWS Marketplace, and automate customer onboarding workflows.
- Designed and developed customer onboarding backend services, exposing RESTful APIs to capture and process customer information after AWS Marketplace purchases. Integrated the system with Salesforce CRM to automatically create and update customer records and synchronize contract details for sales and support teams.

### **WSO2 Lanka (Pvt) Ltd**

Company Registration No: PV 510

Address: 105, Bauddhaloka Mawatha, Colombo 00400, Sri Lanka.

Tel: +94 11 214 5345 | +94 11 743 5800 Fax: +94 11 214 5300

**WSO2.COM**

- Integrated Google Sheets API to store and track onboarding and subscription data, enabling internal teams to access operational information through lightweight reporting dashboards.
- Developed the GitHub Statistics Tool, an internal analytics system that automated the collection and visualization of download statistics across more than 300 WSO2 public repositories. The system retrieved release asset download data using GitHub APIs and stored historical metrics for analysis.
- Implemented scheduled background jobs using Choreo Cronjobs and Ballerina services to periodically fetch repository statistics, store the data in an Azure-hosted MySQL database, and compute daily download metrics through differential analysis.
- Integrated Google Sheets and Looker Studio dashboards to present visual analytics and reporting interfaces for marketing and product teams, enabling data-driven insights into product adoption and open-source community engagement.
- Contributed to the development of middleware services for the Applicant Tracking System (ATS), including Candidate Service and Employer Service, enabling seamless communication between the WSO2 Career Page and internal recruitment systems.
- Contributed to the Integration Studio and Connector Store modernization, assisting with the migration of legacy backend systems to a modern cloud-native architecture to improve scalability, performance, and maintainability.
- Participated in team code reviews and design discussions through Git-based collaboration, providing constructive feedback to maintain code quality, enhance maintainability, and ensure alignment with project objectives.
- Prepared technical documentation, including architecture descriptions, API usage guides, and integration workflows, to support knowledge sharing and maintain project transparency within the development team.

Should you require further clarification please contact the undersigned.

Thank you.
